## Hello yellow

Don't call this season's hottest colour mellow.

Yellow, this year's hot fashion shade, is also set to brighten interiors. Tony Bannister, of trend forecast agency Scout, says bright yellow has been a key colour in Europe for a few seasons – an optimistic reaction to uncertain times. "We noticed yellow being 'fast-tracked' by fashion and homewares retailers," he says. Most popular is a very sharp yellow. According to Page Marchese Norman, *Blueprint* magazine's home editor, it's a great unisex colour that looks fashionable but won't scare blokes. Find it on wallpapers at Signature Prints, in curtains and cushions at Ikea or pick up the original 1960s version at op-shops.
